Salmson

This is the suggested price list to the public

Salmson does not sell directly to end users.
Prices are given for information purposes only and may be used as price references by the professional trades (distributors, consultants, installers, etc.) who can set their sales prices freely depending on the services and guarantees they offer.
Professionals are entitled to benefit from the usual purchasing conditions which apply in our profession.

2017 PRICE LIST

Effective from January 1st, 2017

- Prices are understood Ex Works - Salmson Warehouse - Laval - France.
- Prices can be subject to change without prior notice.
- General Conditions of Sale are listed page 331.

EDITORIAL

Our credo is to develop the solutions of tomorrow.

As a key player on our different markets, we call on a range of different levers:

- **A strong policy of product development and range extensions** to satisfy your changing needs while systematically staying a step ahead of regulatory requirements.
- **A range of services constantly enhanced** with services designed to accompany you in selecting, commissioning and maintaining our products while strengthening your “professional” know-how.
- **A local approach to provide our wholesalers and end customers** with better support at the local level.

And, as always, our teams are on hand to support you in developing successful projects and to present our full range of products, solutions and associated services.

Kind regards,
The Salmson team

DEMANDE DE PRIX >

NEW PRODUCTS
AND RANGE EXTENSIONS

IXENS
HEATING APPLICATION (RANGE EXTENSION)

An in-line pump designed for HVAC, the Ixens has a permanent-magnet synchronous motor offering high energy efficiency and a performance exceeding the requirements of the ErP Directive for 2017. The Ixens enables average electrical energy savings of up to 43% compared to electronic pumps with asynchronous motors.

In 2017, new Ixens products will be launched as a block version (available from the start of the year) and as a double version (during the year).

EC-LIFT UNIT
SEWAGE APPLICATION (NEW)

Management unit, using a microprocessor, for one or two condensate pumps, either submerged or in a dry pit (Rocsan lix, Rocsan evo, SVO, SCA, SBS, AQUAVAL, Mini-SDL, FVO, etc.).

The EC-Lift 1 pump unit will be available during the course of the year..

REGULATIONS

PRESENTATION

The ErP Directive aims to improve the energy efficiency of “Energy related” products.

TIMELINES

- **Circulators**
  A calendar of energy rating improvements has been created.
  Since 1st August 2015 : EEI(1) ≤ 0.23.
- **Pump motors**
  The European Commission has created a calendar to gradually introduce increasingly energy-efficient motors.
- **Since 1st January 2015:**
  IE3(2) or IE2(2) + EVS(3) (7.5 kW ≤ Motor Power ≤ 375 kW).
- **From 1st January 2017:**
  IE3(2) or IE2(2) + EVS(3) (0.75 kW ≤ Motor Power ≤ 375 kW).
- **Pump hydraulics**
  The pump hydraulics must conform to the MEI(4) rating below:
  Since 1st January 2015 : MEI(4) ≥ 0.4.

Field of application

ErP
ENERGY-RELATED PRODUCTS CERTIFIED BY SALMSON®

Within our business, this Directive affects circulators (excluding Domestic Hot Water), pump motors (for three-phase pumps, excluding submersible pumps and a motor power of between 0.75 kW and 375 kW) and pump hydraulics (for surface pumps and submersible pumps circulating fresh water).

Lexicon

(1) EEI : Energy Efficiency Index. Energy efficiency index for circulators that replaces the previous energy labelling system.

(2) IE : International Efficiency. Energy efficiency for pump motors.
The “IE2” replaces the previous “EFF1” index.

(3) EVS: Electronic variation speed (Speed Control in HVAC).

(4) MEI (Minimum Efficiency Index): this factor is defined at the point of optimal performance from the speed, flow rate and a coefficient “C” depending on the type of pump.

GLOBAL EFFICIENCY BY SALMSON®

Alti Nexis Advens

High-performance booster

- A concentration of high performance
  - Robust installation
  - Variable-speed hydraulic pumps
  - Low pressure-loss booster hydraulics
- Enhanced safety
  - Integrated lifting solution
  - Removable protective covers

Nexis Advens

High-performance booster pump

- Optimum energy efficiency
  - Permanent-magnet synchronous motor
  - Constant adjustment of performances
  - Integrated frequency converter
  - Efficiency greater than IE4
- Easy installation and maintenance
  - Reduced floor space required
  - Auto-diagnostic displayed on LCD screen

BOOSTER PUMPS

HOW TO DETERMINE THE FLOW RATE

NUMBER OF INHABITANTS	1 TO 5 PEOPLE			6 TO 10 PEOPLE	
Watering - Garden surface to cover (m^2)	0 to 400	400 to 800	800 to 1000	0 to 500	500 to 1000
Pump flow (m^3/H)	2	3.5	4	3	5

HOW TO DETERMINE THE PRESSURE

Geometrical height (m) = HA + HR

HA: height between the lowest water level and the pump suction.

HR: height between the pump discharge and the highest point of use.

Friction losses (mCE)

Pressure drop caused by friction in the piping network (accessories + suction).

Residual pressure (mWC)

Pressure required for taps or water sprinklers. are mostl y as follows:

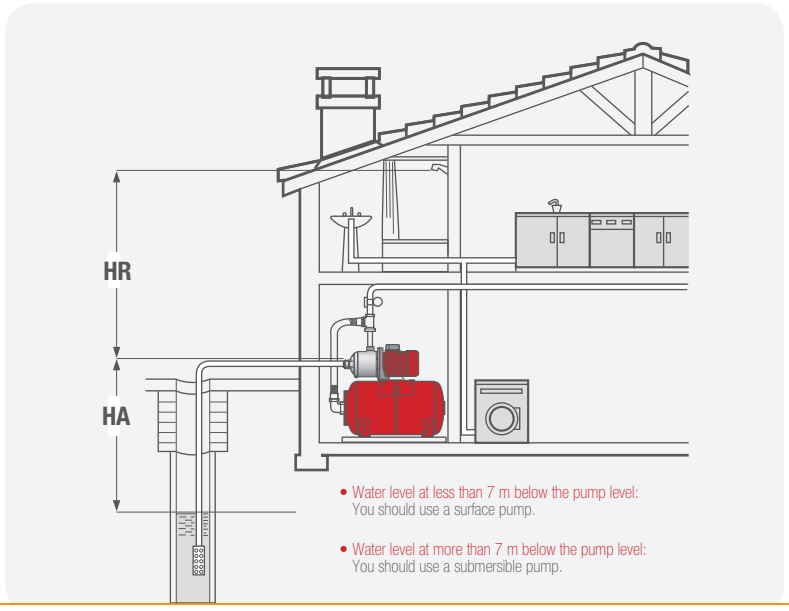
- 1.5 bar (15 mWC) for residential water supply.
- 2.5 bar (25 mWC) for water sprinkling.

Available pressure (mWC)

The pressure available at the pump suction port.

More often coming from the city network or from the water tank located above the pump.

For a negative suction installation. the available pressure is negative.



SURFACE PUMPS

Geometrical height
+
Friction losses
+
Residual pressure
-
Available pressure
=
Total dynamic head

BOREHOLE PUMPS

Discharge height

The pump has always a positive suction so suction HA = 0

+
Friction losses
+
Residual pressure
=
Total dynamic head

The values provided in this chapter are suitable for 90% of the applications.

They are given as a guideline only and should not replace a detailed study.

ASSISTANCE IN THE SELECTION

WATER SUPPLY

The following pump selections are suitable for most of the applications. They are given as a guide line only and should not replace a detailed study.

				NEGATIVE SUCTION PUMP

RECUPEO

RAIN WATER MANAGEMENT SYSTEM

For domestic application

- RECUPEO 204-M

- RECUPEO HOME 204-M

THE SALMSON ASSETS

- The integrated disconnecting system prevents from polluting the municipal water with rain water.
- Prevents from summer water restrictions.
- Water savings.
- Recupeo is a profitable investment in time because drinking water is more and more costly.

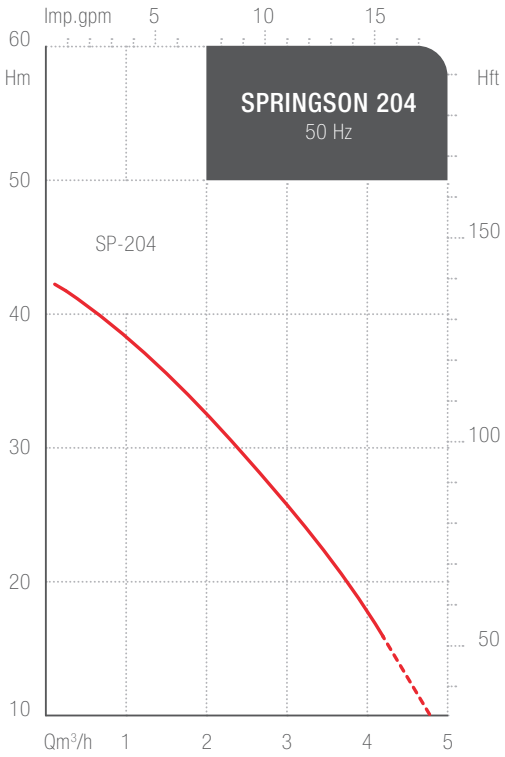
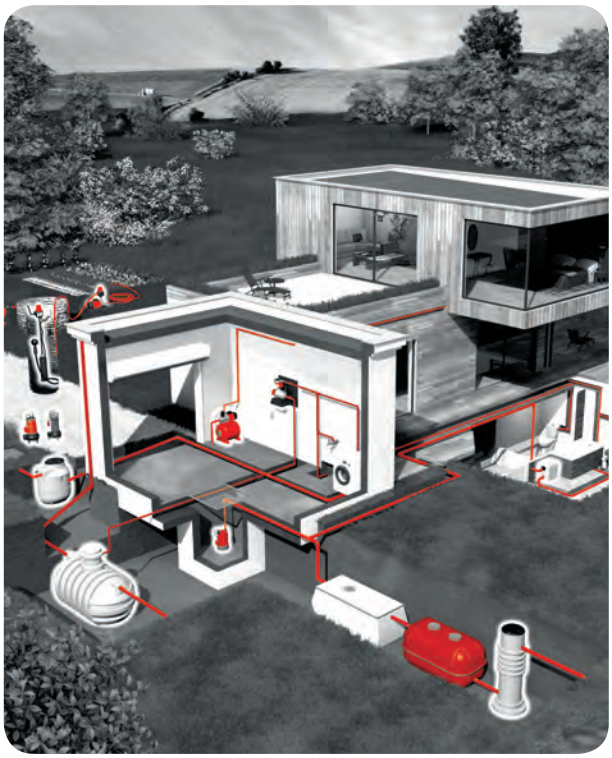
PERFORMANCE RANGE



DISTRIBUTION OF WATER



BENEFITS

Compact design

- All in one : self –priming pump + automatic control system + control panel + 11 liter tank + filling system with float switch + float.

Ready to plug

- Ready to plug to the house plumbing installation.

The integrated disconnecting system prevents from polluting the municipal water with rain waterv

- Complies with EN 1717.
- Automatic switching to the municipal water when the rain water tank is empty.

Silent operation

Cover

- Reduces the noise level.
- Modern design.

RECUPEO MASTER

RAIN WATER MANAGEMENT SYSTEM

For commercial application

● RECUPEO MASTER L

● RECUPEO MASTER XL

THE SALMSON ASSETS

Solution containing all the functions specific to the Rain Water Recovery:

- Automatic management of rain water supply
- Automatic switching rainwater/city water
- Air Guard in disconnection (in compliance with EN 1717).

IMMERSON D4

4" SUBMERSIBLE BOREHOLE PUMPS

Sleeve, shaft and screws in stainless steel. Impellers and diffusers in composite material.

IMMERSON D4 RANGE

THE SALMSON ASSETS

- The D4 immerson is equipped with Noryl floating impellers to provide easy starting and good resistance to abrasion.
- When used in pits or boreholes larger than 4" diameter, a cooling jacket must be used.
- For dry running protection, the BME kit should be used.

IMMERSON S4

SUBMERSIBLE BOREHOLE PUMPS

4" borehole - Stainless steel

IMMERSON S4

Certified ACS

THE SALMSON ASSETS

- All stainless steel version..
- When used in pits or boreholes larger than 4" diameter, a cooling jacket must be used.
- For dry running protection, the BME kit should be used.

HYDROMINI MULTI-H

BOOSTER SETS

Pump casing and impellers in stainless steel 304

● MULTI-H203-M-H50

Certified ACS

> THE SALMSON ASSETS

- Increased life span of the pump thanks to the stainless steel hydraulic (anticorrosion).
- Tank with replaceable bladder.
- For good performance, the diameter of the suction pipes must be larger or the same as the suction diameter of the pump.

VERTICAL MULTISTAGE PUMPS

FOR A PRICE QUOTE, PLEASE CONSULT US

Nexis first-V 200 - 400 - 600 - 1000 - 1600 - 2200 - 3600 - 5200

● Nexis first-V 608

VERTICAL MULTISTAGE PUMPS
Mono-bloc pump housing supplied as standard with cataphoresis coating, impellers in stainless steel 304L
Benefits • The hight efficiency Nexis at an optimized cost • Mono-bloc pump housing and lantern • Compactness
Flow rates up to: 80 m^3/h
Head up to: 285 mCE
Max. service pressure: 30 bar
Temperature range: 120 °C (according to mechanical seal)

THE SALMSON ASSETS

- High hydraulic efficiency and IE3 motor (For P ≥ 0.75 kW).
- Easy maintenance: Cartridge for standard mechanical seal and spacer from 5.5 kW.
- Modmodular construction: Adjustable port to port dimension, swivelling lantern and motor.

X-CARE

X-CARE

The X care is a module which protects against dry running the Nexis pumps not being fitted with a built in variable speed drive. It checks the direction of rotation, the temperature and the pressure which can be preset. It is compatible with most of the communication protocols for BMS integration.

Functions:

- Built in dry running protection.
- Built in pump monitoring.
  - Rotation
  - Pressure
  - Ambient temperature
  - Running time in hours
  - Number of cyclings
  - Protection against low speed (overload) which can be preset.
- Signals transmission by infra red or by CAN bus for BMS.

Benefits:

- Protects the mechanical seal and avoids the short term pump deterioration.
- Allows the anticipation of dysfunctions in the pumping system and consequently extends the pump life time.
- Allows a remote and targeted control of the pump.

Warning: The X care box (protection relay) must be connected to the pump control line in order to proctect the pump. The X care box on its own provides informations but it does not protect the pump.

The X-Care module is an option which cannot be sold separately.

NEXIS-V 400

VERTICAL MULTISTAGE PUMPS

Pump casing and impellers in stainless steel 316L

● NEXIS-V 400

Certified ACS

> THE SALMSON ASSETS

- High hydraulic efficiency and IE3 motor (For P ≥ 0.75 kW).
- Easy maintenance: Cartridge for standard mechanical seal and spacer from 5.5 kW.
- Modular construction: Adjustable port to port dimension, swivelling lantern and motor.

NEXIS-V 1000

VERTICAL MULTISTAGE PUMPS

Pump casing and impellers in stainless steel 316L

● NEXIS-V 1000

Certified ACS

> THE SALMSON ASSETS

- High hydraulic efficiency and IE3 motor (For P ≥ 0.75 kW).
- Easy maintenance: Cartridge for standard mechanical seal and spacer from 5.5 kW.
- Modmodular construction: Adjustable port to port dimension, swivelling lantern and motor.

NEXIS-V 5200

VERTICAL MULTISTAGE PUMPS

Cast-iron or stainless steel bottom pump casing and impellers in stainless steel 304L or 316L

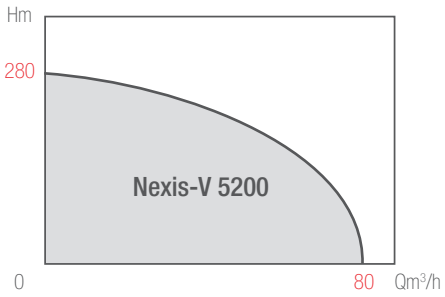
● NEXIS-V 5200

Certified ACS

> THE SALMSON ASSETS

- High hydraulic efficiency and IE3 motor.
- Easy maintenance: Cartridge for standard mechanical seal and spacer from 5.5 kW.
- Modular construction: Adjustable port to port dimension, swivelling lantern.

> PERFORMANCE RANGE



> ACRONYMS

O	Oval flanges (NP 16 and max. pressure 16 bar)
F	Round flanges (NP 25 and max. pressure 25 bar)

NEXIS ADVENS 1000-1600

VERTICAL MULTISTAGE PUMPS
HIGH EFFICIENCY WITH VARIABLE SPEED

Bottom pump casing and impellers in stainless steel 304L or 316L - Synchronous motor > IE4 (IEC 60034-31 Ed.2)

● NEXIS-ADVENS

EVS Certified ACS

GLOBAL EFFICIENCY BY SALMSON®

> THE SALMSON ASSETS

- High hydraulic efficiency and motor > IE4 - l'IEC 60034-31 ed2.
- Easy maintenance: Cartridge for standard mechanical seal and spacer from 5.5 kW.
- Modular construction: Adjustable port to port dimension, swivelling lantern.

NEXIS-VE 1000

VERTICAL MULTISTAGE PUMPS WITH ELECTRONIC VARIABLE SPEED

Bottom pump casing and impellers in stainless steel 304L or 316L. IE4 motor

● NEXIS-VE 1000

EVS Certified ACS

THE SALMSON ASSETS

- High hydraulic efficiency and IE4 motor.
- Easy maintenance: Cartridge for standard mechanical seal and spacer from 5.5 kW.
- Modular construction: swivelling lantern.

MULTISTAGE CENTRIFUGAL PUMPS

PRICES ON REQUEST

● Multi VSE

Certified ACS

MULTI STAGE CENTRIFUGAL PUMPS SILENT VARIABLE SPEED ELECTRONIC VERTIC AL AXIS
Wet rotor
Benefits • Wet rotor motor technology reduces the noise level by 20 db(A) compared to the use of a standard ventilated motor. This means that the noise level drops by 90%. • Being very silent, these pumps can be installed very closed to living accomodations. • No mechanical seal • Quiet operation
Flow rates up to: 16.5 m^3/h
Head up to: 108 mCE
Max. service pressure: 16 bar
Temperature range: -10 to +50 °C

Depuis 1976 . 3 agences : Herblay (95), Sèvres (92), Étréchy (91) . 4 rue Lavoisier, 95223 Herblay Cedex . Tél. 01 39 97 65 10 . service-commercial@motralec.com . www.motralec.com

HYDROMINI NEXIS-V

BOOSTER SETS
WITH 3-PHASE VERTICAL MULTISTAGE PUMPS

Bottom pump casing and impellers in stainless steel 304 - High efficiency hydraulic - IE3 motor (For P ≥ 0.75 kW).

● HYDROMINI NEXIS V

Certified ACS

> THE SALMSON ASSETS

- High efficiency hydraulic, thanks to the Nexis V pump.
- Increased life span of the pump thanks to stainless steel hydraulic (anti-corrosion).
- In order to guarantee the pump performance, the diameter of the suction pipe must be larger or equal to the suction diameter of the pump.

FIRE FIGHTING BOOSTER SYSTEMS

FOR A PRICE QUOTE, PLEASE CONSULT US

● HPBS

BOOSTER SYSTEMS FOR FIRE HYDRANTS
Booster systems equipped with monobloc PBS pump type for fire hydrants complying with the NF S 62-201 and the R5 rule from the APSAD.
Control panel Drives totally the booster system operating mode. Available as standard with IPC (Isolating Permanent Controller).
Flow rates up to: 55 m^3/h
Heads up to: 73 mCE
Max. service pressure: 10 bar
Temperature range: +45 °C

● Fireskid

FIRE EXTINGUISHING SYSTEMS FOR SPRINKLER APPLICATIONS IN BUILDING SERVICES
Compact booster system, pre-assembled and tested at the factory, to prevent and to extinguish fires. Complies with the EN 12845 standard. For fire protection in commercial Building Services, hotels, hospitals... For clear and non agressive water applications.
Benefits • Compact system pre-assembled and tested at the factory • Jockey pump supplied as standard • Horizontal back pull-out pumps with either an electric motor or a diesel engine sized up to 16 m NPSH. • Connection to the fire protection piping installation with a flanged discharge collector. • Collector pipe hangers.
Flow rates up to: 350 m^3/h
Heads up to: 90 mCE
Max. service pressure: 16 bar
Temperature range: +40 °C

HOW TO SELECT A PUMP?

HOW TO DETERMINE THE FLOW RATE

	RAIN WATER			DOMESTIC WASTE WATER		FULL WATER		WASTE WATER	
	Collection surface (m^2)			Number of inhabitants		Number of inhabitants		Number of inhabitants	
	15	30	70	4 to 6	7 to 10	4 to 6	7 to 10	4 to 6	7 to 10
Flow (m^3/H)	3	6	12	5	6	7	8	8	9

Clear water: water with no or few suspended particles (rain water for example).
Domestic waste water: shower, sink, kitchensink washing machine…
Foul water: toilet.
Waste water: toilet waste + household waste.

HOW TO DETERMINE THE PRESSURE

Discharge lift

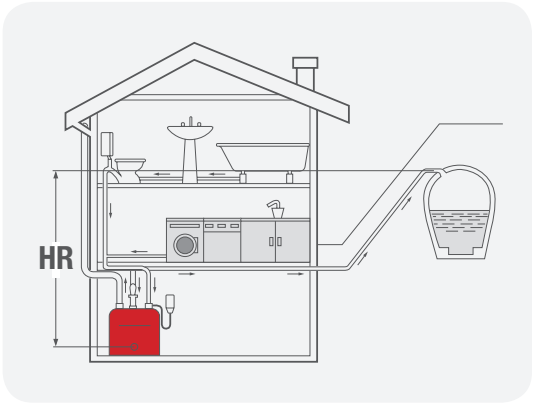
Height at which it is necessary to make the water rise: slope between the water level and the evacuation level.

Friction losses (mWC)

Pressure drop caused by friction in the piping network.

Friction losses in the new pipes

Expressed in m of water column per m of metal pipe.
For PVC pipes, take 80% of the values below.



NOMINAL DIAMETER OF THE PIPES	FLOW m^3/H																			
	0.2	0.5	0.7	1	1.5	2	3	4	5	6	7	8	9	10	12	15	20	25	30	40
½"	0.015	**0.100**	0.200	0.400																
¾"	0.003	0.020	0.040	**0.080**	0.170	0.330														
1"		0.005	0.010	0.024	**0.050**	**0.090**	0.210	0.320

1"½				0.002	0.005	0.009	0.022	**0.035**	**0.060**	0.080	0.120	0.140	0.190	0.230	0.330					
2"					0.001	0.003	0.006	0.010	0.018	**0.025**	**0.035**	**0.045**	0.057	0.070	0.100	0.150	0.260			
65							0.002	0.005	0.007	0.010	0.013	0.017	**0.021**	**0.025**	**0.035**	0.053	0.088		0.188	0.325
80								0.001	0.002	0.003	0.003	0.005	0.006	0.007	0.010	**0.016**	**0.028**	0.044	0.063	0.112
100												0.001	0.002	0.002	0.003	0.005	0.008	**0.013**	**0.019**	0.033
125															0.001	0.002	0.003	0.004	0.006	**0.011**
150																	0.001	0.002	0.002	0.004

PLEASE NOTE: the values in red are the flow rates in between 1 and 1.5 m/s.

Friction losses in accessories

Expressed in straight lengths (m) of equivalent pipe.
Example : 1 90° screw-in elbow, Ø 100, with the same head loss as 4 m of straight pipe with the same diameter.

ACCESSORIES	PIPE NOMINAL DIAMETER									
	25	32	40	50	65	80	100	125	150	200
Straisser foot valve	4	5	7	9	11	15	20	26	34	46
90° threaded elbow	1	1.3	1.6	2	2.6	3.2	4			
90° flange elbow				0.7	0.9	1.1	1.4	1.7	2.1	2.6
Screw-down stop valve	10	**13**	16	20	26	34	45			
Straight-through passage valve				0.5	0.6	0.7	0.9	1.1	1.4	1.8
Non return valve	6	7	**8**	**10**	10	10	12	15	18	24

RECOMMENDED PIPE DIAMETERS

MAX FLOW (m^3/H)		PIPE DIAMETER
SUCTION	DISCHARGE	
-	0.35	½" (15-21 mm)
0.7	0.8	¾" (20-27 mm)
1.4	1.4	1" (26-34 mm)
2.7	3.0	1 ¼" (33-42 mm)
4.2	4.5	1 ½" (40-49 mm)
7.3	8.0	2" (50-60 mm)
13.5	16.0	65 mm
21.0	25.0	80 mm
36.0	46.0	100 mm

Household waste water
Water with no fat content containing fibrous matter.

Kitchen water
Water with fat content.

Aggressive water
Swimming pool water and sea water.

Acidic water
Boiler water, softener / air-conditioner waste.

Polluted water
Traces of hydrogen in water, car park water.

Toilet waste
Drain waste, water containing fibrous residue and particles.

SUBSON

CLEAR WATER OR SLIGHTLY SOILED WATER PUMPS

A version

Polypropylene pump casing and Noryl impeller

● SUBSON 10MF

● SUBSON AB 20

THE SALMSON ASSETS

- SAN system (patented): the particles are mixed by the recycling of the pumped water to clean out the sump and prevent the pump from fouling.
- The AB models are not equipped with the SAN device. Those models are designed to operate with 2mm minimum residual water level.

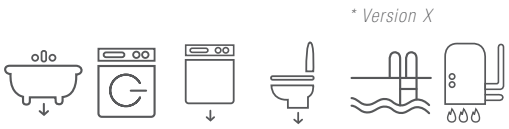
SVO-SCA 206

SEWAGE WATER PUMPS



Pump casing and impeller in composite material - Stainless steel motor - 10 m of electric cable

● SVO 206-1.1M

THE SALMSON ASSETS

- Easy and quick cleaning of the hydraulic part, only three screws to remove to get access.
- 316L stainless steel version available for sea water and corrosive fluid applications.

ROCSAN EVO C

SEWAGE WATER PUMPS

Pump casing, motor housing and vortex impeller in cast-iron

● ROCSAN EVO C

THE SALMSON ASSETS

- Independent double mechanical seal foroptimized safety.
- Single channel impeller.
- Intermittent operation.
- Pump casing and impeller Ceramic coating with optional.
- Submersible motor optional.

INSTALLATION DIAGRAMS

LIFTING STATIONS

FOR A PRICE QUOTE, PLEASE CONSULT US

● SIR 1500-2500

INTERMEDIARY LIFTING STATIONS

Lifting of waste water with or without solid particles, greasy water, storm water, coming either from collective or industrial networks.

For outdoor applications and for underground installations only.

Benefits

- Fully sealed up to the maximum level
- High capacity tanks, unbreakable, proof against acids, bases, oils, milk and hydrocarbons
- Cover with lock designed for pedestrian pavements (Can resist up to 250 daN)
- Hole for the adaptation of a carbon filter (not part of the scope of supply)
- Possibility to add a cage screen (as an option) after the installation of the station
- Connection to the inlet pipe with a soft ring gasket allowing an angular discrepancy without any risk of breakage or disconnection.

● SIR DELTA

LIFTING STATIONS

Lifting of the drain waters and / or the waste waters… coming from residential buildings and/or commercial building.

Only for outdoor applications and for buried installations.

Benefits

- Station which can be equipped with valve chamber, screen, submersible mixer, draining valve, fallproof gate, intermediary roofbridge
- Large choice of pumps (cutting, vortex , chanel…)
- Modular control panel with possibility of remote-report and remotecontrol
- Fully adaptable to site problematics (height, diameter, inlets and outlets position…)
- Underground installation possible with concrete slab
- Resin/fiber high resistance construction for phreatic table applications

Diameter: $1 < Ø < 2.9$ m

Height: $1.5 < H < 8$ m

Flow rates: $6 < Q < 400$ m³/h

Total heads up to: $2 < HMT < 65$ mcE

Depuis 1976 . 3 agences : Herblay (95), Sèvres (92), Étréchy (91) . 4 rue Lavoisier, 95223 Herblay Cedex . Tél. 01 39 97 65 10 . service-commercial@motralec.com . www.motralec.com

LIFTING STATIONS

FOR A PRICE QUOTE, PLEASE CONSULT US

● SIR 600

LIFTING STATIONS

Lifting station for clear water, waste water or sewage (depending on the version), with or without particles or faecal matter, every time the evacuation level is situated below the collection network: sanitary installations, WC, showers, kitchens.

Benefits

- Single-piece tank in white polyethylene for improved visibility
- Conical tank base to avoid sedimentation at the bottom of the station
- Different inputs possible
- Out-of-water coupling system for simple extraction using the chain
- Stainless steel corrosion-resistant pipe
- Veins avoiding additional loads in the event of groundwater
- 200 to 500 mm telescopic extension (versions B and D)
- Category A (15 kN), B (125 kN) and D (400 kN) covers available
- Accessible double-check valve for easy maintenance
- Pressure-reduction system available to avoid creation of a vacuum

HOW TO SELECT A CIRCULATOR

DETERMINING THE FLOW RATE:

The flow rate depens on:

- boiler capacity
- difference (ΔT) between the “start” temperature and the “return” temperature.

ΔT will depend on type of heating system and is normally shown on tables provided by system supplier.

The following average values can be taken into account:

- radiators: 15/20 °C
- underfloor heating: 10 °C.

$$Q\ (m^3/h) = \frac{P\ (kW)}{\Delta T\ (°C) \times 1.163}$$

Note: on system where the boiler is used for production of secondary hot water as well as for heating, only that part of its output dedicated to heating should be taken into consideration in the formula above.

EXAMPLE: FOR AN INSTALLED CAPACIT Y OF 10 KW	
RADIATORS	UNDERFLOOR HEATING
$Q = \frac{10}{15 \times 1.163} = 0.57\ m^3/h$	$Q = \frac{10}{10 \times 1.163} = 0.85\ m^3/h$

DETERMINING THE TOTAL MANOMETRIC HEAD:

In a closed circuit. the Total Manometric Head is equal to the pressure losses.

Flamand's law – TMH of modern systems is approx 20mm/linear metre.

More precise data are given in the table below:

Pressure losses in new pipeworks

FLOW	NOMINAL DIAMETER OF PIPEWORK				
m^3/H	½"	¾"	1"	1¼"	1½"
0.1	0.004				
0.2	0.015	0.003			
0.5	0.100	0.020	0.005	0.001	
0.7	**0.200**	0.040	0.010	0.002	
1	0.400	0.080	0.024	0.005	0.002
1.5		**0.170**	0.050	0.010	0.003
2		0.330	**0.090**	0.020	0.009
3			0.210	**0.045**	0.022
4			0.320	0.076	0.035
5					**0.060**

The data is expressed in water column meters per linear meter of metallic pipe.

For PVC pipework take 80% of values shown opposite (multiply values by 0.8).

Values in red match flow velocity ranging from 1 to 1.5m/s (max speed recommended).

● SIE - DIE

EVS

SINGLE AND TWIN IN-LINE PUMPS - ELECTRONIC CONTROL - STANDARD IE2 MOTOR
Floskid pre-assembled system equipped with SIE pumps available as standard (see here below)
Flow rates up to: 800 m^3/h
Heads up to: 65 mCE

● Floskid

EVS

MULTI PUMP SYSTEM OPERATING IN CASCADE FOR HVAC APPLICATIONS
Range available as standard - Ex works availability: 4 weeks
Compact system equipped with 2+1/3+1 LRE/SIE variable speed pumps operating in cascade and mounted on a common base plate. System driven by an HVAC SCe control pannel.
System especially designed for variable flow installations in heating and air cooling applications.
Benefits
Hight energy savings: optimised cascade operation. - Quick and easy to instal: compact system. Pre-assembled, Ex Works availability: 4 weeks. - High reliability: tested at the factory. - Quite operation: pump sizes and motor ratings reduced.
Flow rates up to: 50 to 360 m^3/h
Heads up to: 45 mCE
Fluid temperature: 0 to +120 °C
Temperature range: -20 to +40 °C
Max. service pressure: 16 bar (SIE version) - 10 bar (LRE version)

ELECTRONIC CONTROL PUMPS

FOR A PRICE QUOTE, PLEASE CONSULT US

Ixens

IN-LINE HIGH EFFICIENCY PUMPS
HIGH-EFFICIENCY EC MOTOR (EFFICIENCY HIGHER THAN IE4 LIMIT VALUES ACCORDING TO IEC TS 60034-31 ED.2)

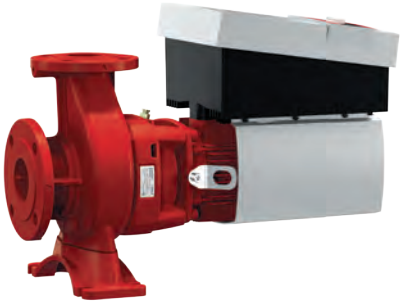
Benefits

- Up to 70% energy savings in average in comparison with a fix speed in line pump.
- Compact design: 55% weight reduction and 39% height reduction in comparison with a SIE pump.
- Common control and drive interface with the others electronically driven Salmson pumps.

Flow rates up to: 120 m³/h

Heads up to: 51 mCE

Ixens bloc



IN-LINE HIGH EFFICIENCY PUMPS
HIGH-EFFICIENCY EC MOTOR (EFFICIENCY HIGHER THAN IE4 LIMIT VALUES ACCORDING TO IEC TS 60034-31 ED.2)

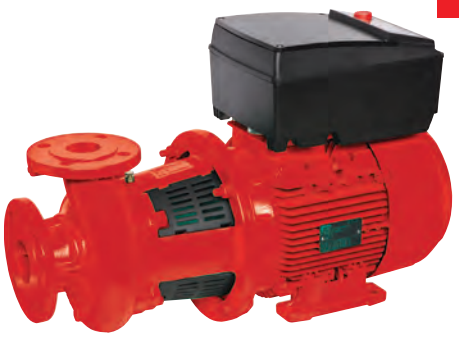
Benefits

- Up to 43% energy savings in average in comparison with asynchronous motor with variable speed pumps.
- Housing dimensions according to EN 733
- Common control and drive interface with the others electronically driven Salmson pumps.

Flow rates up to: 120 m³/h

Heads up to: 48 mCE

PBE



END-SUCTION MONOBLOC PUMP ELECTRONIC CONTROL
STANDARD IE2 MOTOR (FROM 0.75 KW)

Benefits

- Self adjustment of the pump performance to the demand.
- Common control and drive interface with the others electronically driven Salmson pumps.
- Running and default informations instantaneously available or registered.
- For sanitary hot water applications, an ACS version (P2) is available on request.

Flow rates up to: 380 m³/h

Heads up to: 85 mCE

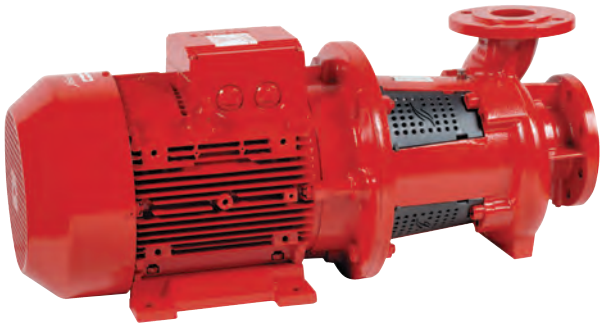
PBS 32/40

END-SUCTION MONOBLOC PUMP

Standard IE3 motor (from 0.75 kW)

- PBS 32/40



> THE SALMSON ASSETS

- High hydraulic efficiency and IE3 motor.
- Various options available: mechanical seals, materials, motor IP ratings.
- CC HVAC, VR HVAC control boards available on request.

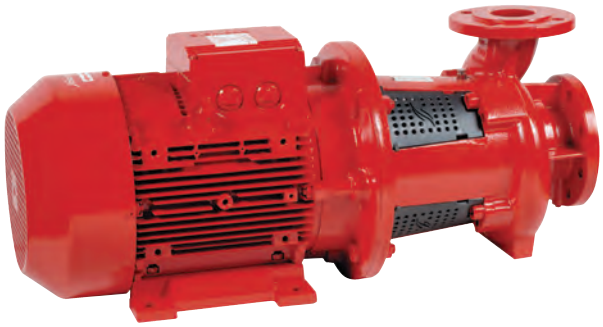
PBS 125/150

END-SUCTION MONOBLOC PUMP

Standard IE3 motor

- PBS 125/150



> THE SALMSON ASSETS

- High hydraulic efficiency and IE3 motor.
- Various options available: mechanical seals, materials, motor IP ratings.
- CC HVAC, VR HVAC control boards available on request.

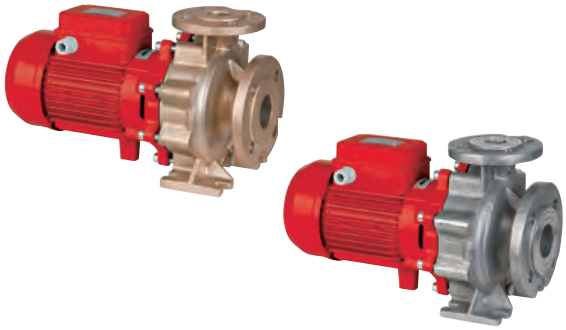
END-SUCTION MONOBLOC PUMP

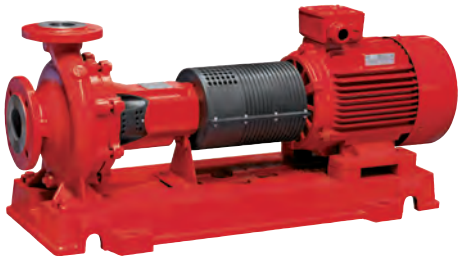
FOR A PRICE QUOTE, PLEASE CONSULT US

BRL



END-SUCTION MONOBLOC PUMPS
Benefits
Two versions available:
- BRL-B: Bronze construction
- BRL-X: 316 Stainless steel construction EN 733 and EN 1092-2
• Compact design (extended shaft motor) 2 or 4-pole motor
Flow rates up to: 700 m^3/h
Heads up to: 180 mCE
Max. service pressure: 16 bar
Temperature range: -40 to +170 °C
ND : 32 to 300

NOS

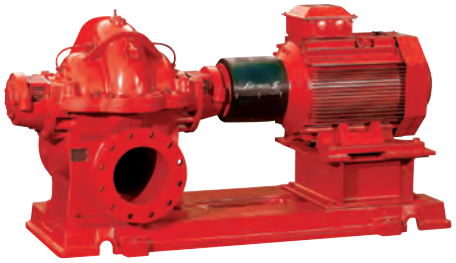


STANDARD END-SUCTION PUMPS
Benefits
• EN733
• NOE/NOH extension
• Bareshaft pump
• 2 or 4-pole motor
Flow rates up to: 700 m^3/h
Heads up to: 180 mCE
Max. service pressure: 16 bar
Temperature range: -40 to +170 °C
ND : 32 to 300

NOES

SINGLE-STAGE END-SUCTION PUMPS MOUNTED ON BASEPLATE
Benefits
• High efficiency
• Adjusted impeller diameter to match the duty point
• Low NPSH, thanks to the suction port optimized geometry
• High quality base plate made of cast iron to minimize the vibrations
• With spacer as standard for easy maintenance
Flow rates up to: 1 600 m^3/h
Heads up to: 105 mCE
For all modeles PN 16
Temperature range: -20 to +120 °C
ND : 150 to 300
Material
• GGG (shot graphit casting) Bronze impeller as an option

SCP



AXIALLY SPLIT CASE PUMPS
Benefits
• EN733 and ISO 5199
• ATEX possible version
Flow rates up to: 17 000 m^3/h
Heads up to: 250 mCE
Max. service pressure: 16 bar
Temperature mechanical seal: -8 to +120 °C
Temperature packing gland: max. +105 °C

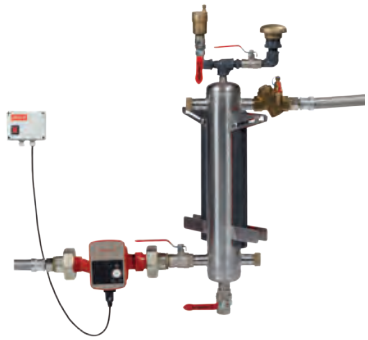
SLUDGE REMOVAL SETS

Cleanskid



PROTECTION OF THE HVAC INSTALLATIONS AGAINST SLUDGE FORMATION BY CONTINUOUS REMOVAL OF THE SOLID PARTICLES IN SUSPENSION

Benefits

- Removes the natural sludge. Risk free for the environment
- Control of energy consumption: The pipeworks remain clean. The ricks of obstructed pipeworks and local overheatings are eliminated
- Keeps the water caracteristics and the initial flow of the installation in the long run.
- Easy mounting and maintenance
- Preset module at factory

Volume of installation: 0.5 to 40 m³/h

Max. service pressure: 10 bar

Temperature range: 0 to +100 °C

ND closed network: 15 to 250

Cleanskid Comfort

PROTECTION OF THE HVAC INSTALLATIONS AGAINST SLUDGE FORMATION BY CONTINUOUS REMOVAL OF THE SOLID PARTICLES IN SUSPENSION. THIS WITH A CONTINUOUS AND AUTOMATIC VENTING OF THE PIPEWORK

Benefits

- Optimum efficiency up to 98%: all solid particles in suspension down to 40 microns are extracted
- Drainage of the natural sludge, risk free for the environment
- Control of energy consumption: the pipeworks remain clean. The ricks of obstructed pipeworks and local overheatings are eliminated
- Continuous automatic venting

Volume of installation: 10 to 900 m³/h

Max. service pressure: 10 bar

Temperature range: -8 to +100 °C

ND closed network: 40 to 600

CONTROL AND PROTECTION BOXES

LIFTING

- Management of one or two pumps in fixed installation: immersed sump or dry well.
- Level monitoring and protection of motor(s) against over currents, thermal overloads and dry running operation.

MS-LIFT control box

CURRENT RANGE IN A	ARTICLE N°	REFERENCE **S14**	UNIT PRICE
1.5 to 12	2539750	S-CTRL-MS-L-1x4kW-M-DOL	**567 €**
	2539751	S-CTRL-MS-L-1x4kW-T4-DOL	**567 €**

- For submersible pumps up to 4 kW.
- For 1 pump
  - Can be used with 2 level regulator (float switch).
  - Power supply system: can be used for both, 1-phase 230V and 3-phase 230/400 V.

CURRENT RANGE IN A	ARTICLE N°	REFERENCE **S14**	UNIT PRICE
1.5 to 12	2539754	S-CTRL-MS-L-2x4kW-M-DOL	**713 €**
	2539755	S-CTRL-MS-L-2x4kW-T4-DOL	**713 €**

- For 2 pumps
  - Can be used with 3 level regulators (float switch).
  - Power supply system: according to box, 1-phase 230 V or 3-phase 400 V model.

EC-LIFT control box

CURRENT RANGE IN A	ARTICLE N°	REFERENCE **S14**	UNIT PRICE
0.3 to 12	2543213	S-CTRL-EC-L-1x12A-MT34-DOL-WM	**1 143 €**
	2543223	S-CTRL-EC-L-2x12A-MT34-DOL-WM	**1 601 €**

- For the 2 models, can be used an air pressure switch:
  - IPAE 0-1m Ref. 2519924 (10 m) or Ref. 2519925 (30 m) or Ref. 2519926 (50 m).
  - S-CTRL-EC-L-1x12A-MT34-DOL-WM: model 1 pump, 1-phase 230V or 3-phase 380/400V.
  - S-CTRL-EC-L-2x12A-MT34-DOL-WM: model 2 pumps, a1-phase 230V or3-phase 380/400V.

Possibility to operate with float swiches :
- *S-CTRL-EC-L-1x12A-MT34-DOL-WM : can be used with 3 float switch*
- *S-CTRL-EC-L-2x12A-MT34-DOL-WM : can be used with 4 float switch*
- *NIV0430-1x10 Ref. 4027319 (10 m) or NIV0430-1x30 Ref. 2529027 (30 m) or FLOAT SWITCH MS 1/50M Rée. 4099440 (50 m).*

4066596	CONTACTOR DISJONC MAGN THER 6,3/10A	174 €

- Circuit breaker with green signal light integrated. Two packing box of wiring are supplied.
- For all pumps 1-phase or 3-phse (380 V) - Max. 10 A.
- Overload thermal protection for circulators. Control sets are depending on model types.

AUTOMATION

- For domestic pump applications (Acson Vario).
- For Jetson - Hydroson - Springson - Aquason - Immerson - Multi-H.
- Protection, control and automatic management of domestic water pumps.
- Includes dry running protection.

Protectis home first

CHARACTERISTICS	PROTECTIS HOME FIRST
Max. Service pressure	10 bar
Max. flow	10 000 l/h (10 m³/h)
Power	1-phase 230 V
Connection (threaded holes)	G1"

- With manometer.

Protectis home first kit

ARTICLE N°	REFERENCE **S14**	UNIT PRICE
4194444	Protectis home first	152 €
4046703	Protectis home first kit	83 €

Kit for easy assembling of the Protectis home first on a pump with 1" female ports

- Max. 8 bar - 80°C maxi - 50/60 Hz - 1-phase 220/240 V.

Salmson pump control

ARTICLE N°	REFERENCE **S14**	UNIT PRICE
2119727	Kit Salmson Pump Control	**425 €**

PC kit to control by infra red the Salmson pumps being fitted with a built in variable speed drive.

Kit contents:

- A specific USB key.
- A CD for the installation.
- An unique and intuitive interface.
- An access to the pump operating parameters.
- Facilitated operations of commissioning, control and maintenance:
  - Saferecord of the pump parameters settings.
  - Record of the pump operating parameters evolution during a certain period of time.
  - Histogram of the flow delivered by the pump.
  - Visualisation of the defaults history and of the pre defaults datas.

LIFTING CABLE

For submersible pumps

ARTICLE N°	REFERENCE **S14**	UNIT PRICE
21039	CABLE-STAINLESS-STEEL 316L-D3MM	6 €
21040	FLAT-CABLE-CLAMP-2-BOLT	6 €

- Ø 3 mm cable stainless steel 316L (per meter).
- Max. load 120 kg.
- Stainless steel flat fixing system for cable with 2 bolts.

PEDESTAL KIT

For sewage pump:

- For easy handling of the pump.
- Guidance using bars or cables.

Kit includes:

- 1 foot elbow,
- 1 pump support,
- 1 support for the top of the bar(s),
- 1 sealing gasket and one screw kit to fix the pump, to anchor the foot and to anchor the support on the top.

DN40

ARTICLE N°	REFERENCE **S14**	UNIT PRICE

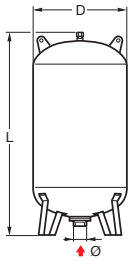
PRESSURE VERTICAL BLADDER VESSELS



On floor mounted with feet

- Direct pressure boosting: a small vessel maintains the pressure in the installation when no delivery is required and protects the control devices against pressure variations and water expansion.
- Conventional pressure boosting: a large vessel with a large useful water reserve covers the low deliveries required by the installation.
- Vessels have the ACS approval.
- 8 to 35L : direct assembly on piping - 50 to 2 000L : on floor mounted with feet.

VT: Vertical - V: Bladder

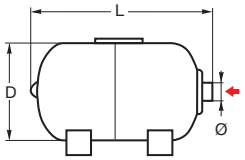
PRESSURE HORIZONTAL BLADDER VESSELS



- Direct pressure boosting: a small vessel maintains the pressure in the installation when no delivery is required and protects the control components against pressure variations and water expansion.
- Conventional pressure boosting: a large vessel with a large useful water reserve covers the low deliveries required.
- ACS certified tanks (potable water).

HZ: Horizontal - V: Bladder
