ELECTRIC SUBMERSIBLE SEWAGE PUMP

MODY “MC” SERIES SUBMERSIBLE PUMP

The design of the Mody “MC” series chopper pump ensures that fibrous waste and debris in suspension are cut into small pumpable segments allowing blockage free flow through the pump. The pump has a channel impeller design with blades that extend into a sharp edged cutting cone that rotates against a fixed, adjustable knife with a hardened steel blade. The unique solids cutting mechanism makes this pump suitable for many difficult, heavy duty pumping applications and guarantees substantial reduction in maintenance time and costs.
