Horizontal Split Case

The protection of life is not a matter for compromise

This is particularly true for fire protection systems where they are only as strong as their 'weakest link' and compromise may result in avoidable loss of life or property.

That is why SPP fire pumps are designed specifically for the very particular needs of fire protection and are approved by most of the major fire protection bodies around the world.

By selecting an approved SPP Fire Pump as part of an approved system and maintained in accordance with standards such as NFPA 20, you can sleep easy knowing that you have chosen the best you can get.

FM/UL Horizontal Split Case Fire Pumps

SPP Pumps have been manufacturing fire pumps for over 125 years with one of the widest range of approvals of any manufacturer in the world. Experience gained from extreme environments such as off-shore oil & gas installations has led to the creation of the SPP FM/UL Horizontal Split Case range of fire pumps approved for life protection by FM Approvals and Underwriter Laboratories.

SPP Horizontal Split Case pumps can be found in most types of installation around the world including:

- Office buildings
- Hospitals
- Airports
- Manufacturing facilities
- Power stations
- Pharmaceutical facilities
- Schools/College

Applications include:

- Sprinkler systems
- Hydrant systems
- Deluge systems
- Monitor systems
- Water curtain
