Water technology at your service

DRN - DGN - GRN - APN - MAN

Electropompes submergées avec roue mobile de type **bicanal ouverte, vortex**, avec **système de broyage**, à **grande hauteur manométrique** et **monocanal ouverte**

Electrobombas con impulsor doble canal abierto, vortex, con sistema de trituración, con grande altura manometrica y monocanal abierto

- Indiquées pour eaux chargées d'origine civile et industrielle
Adecuada para aguas cargadas de origen civil y industrial
- Puissance de 1,1 à 4,1 kW, 2, 4 et 6 poles
Potencia de 1,1 a 4,1 kW, 2, 4 y 6 polos
- Prédiposition pour système de refroidissement
Preparada para el montaje del sistema de refrigeración
- Large passage libre
Amplio paso libre

DRN - DGN - GRN - APN - MAN

Electropompes submergées avec roue mobile de type **bicanal ouverte, vortex**, avec **système de broyage**, à **grande hauteur manométrique** et **monocanal ouverte**

*Electrobombas con impulsor **doble canal abierto, vortex**, con **sistema de trituración**, con **grande altura manométrica** y **monocanal abierto***

Electropompes industrielles projetées avec des nouveaux paramètres mécaniques et électriques pour améliorer l'efficacité et la fiabilité

Electrobombas diseñadas con nuevas características mecánicas y eléctricas al fin de aumentar el rendimiento y la fiabilidad

Double câble électrique d'alimentation

Longueur standard 10 m

Cable eléctrico doble de alimentación

Longitud estándar de 10 m

Carcasse

en fonte GJL-250. Protection IP68

Carcasa

de fundición GJL-250. Protección IP68

Sonde d'étanchéité chambre à huile

Sonda de integridad del aceite

Arbre moteur

accouplé à la roue par un joint conique

Eje

con acoplamiento al impulsor mediante una junta cónica

Entretien facilité

De particulières astuces de conception facilitent les opérations d'entretien

Facilidad de mantenimiento

Dispositivos de fabricación especiales facilitan las operaciones de mantenimiento

Presse-câble

avec filetage GAZ, prééglé pour canaliser le câble

Sujetacable

con roscado GAS, adecuado para introducir el cable

Roulements

Ils sont protégés et lubrifiés à vie et dimensionnés pour assurer 20 000 heures de fonctionnement

Rodamientos

Blindados y con lubricación permanente, de dimensiones adecuadas para garantizar 20.000 horas de funcionamiento

Garnitures mécaniques opposées

L'accès à la chambre se fait par moyen d'une boucle démontable

Cierres mecánicas en posición opuesta

Un casquillo apretado con llave de sector para acceder a la cámara de las juntas

**BREVETÉ
PATENTADO**

Bride d'aspiration

Avec perçage PN6, prééglée pour le montage sur l'embase en fonte

Brida de aspiración

Con perforación PN6, preparada para el montaje en base de fundición

DRENO (DR)

Page
Página 5

Roue mobile multicanal ouverte à haut rendement
Indiquée pour des utilisations poussées en milieu civil et industriel

*Impulsor multicanal abierta de alto rendimiento
Indicada para trabajos pesados en entornos civiles e industriales*

 40 ÷ 100 mm

DRAGA (DG)

Page
Página 10

Roue mobile reculée de type **VORTEX** qui assure de larges passages libres et même intégraux

Impulsor retrocedido tipo VORTEX que garantiza amplios pasos libres, incluso integrales

 65 ÷ 150 mm

GRINDER (GR)

Page
Página 16

Le **SISTEME DE BROYAGE** est formé d'un disque et un couteau triangulaire en acier INOX d'une excellente résistance pouvant hacher finement des corps solides et filamenteux

El SISTEMA DE TRITURACION está compuesto por un disco y una cuchilla triangular de acero INOX de alta resistencia que puede triturar de forma fina cuerpos sólidos y filamentosos

Version 2 pôles
Versión de 2 polos

Version 4 pôles
Versión de 4 polos

Alta Prevalenza (AP)

Page
Página 19

Roue mobile à grande **HAUTEUR MANOMETRIQUE**.
Un usinage particulier, sur l'arrière ou sur le côté de la roue mobile, garantit la lacération des petits corps

*Impulsor de GRANDE ALTURA MANOMETRICA.
Una especial mecanización en la parte trasera o en el costado del rotor asegura la laceración de cuerpos pequeños*

 10 mm

MACS (MA)

Page
Página 21

Roue **MONOCANAL OUVERTE**
La conformation particulière de la palette de la roue mobile et le sillon gravé sur le pied de support, assurent l'expulsion des petits corps en leur offrant ainsi une voie d'issue

*Impulsor de UN CANAL ABIERTO
La particular conformación de la pala del impulsor y el surco grabado en el pie de soporte garantizan la expulsión de pequeños cuerpos sólidos dándoles una vía de fuga*

 40 ÷ 100 mm

Anti-Clogging System

Dans la partie arrière, la roue est dotée d'un dispositif empêchant aux corps solides en suspension d'atteindre et endommager garniture mécanique plus extérieur.

En la parte posterior, el impulsor está dotado de un sistema que impide que los cuerpos sólidos en suspensión alcancen y dañen el cierre mecánico más exterior.

Le système anticlogmatage (**ACS=Anti Clogging System**) assure le déchirement des fibres. En outre, des solutions de construction particulière permettent d'augmenter le débit d'eau à l'intérieur du circuit de refroidissement, tout en assurant le refroidissement correct du moteur dans les cas d'installation à sec.

El sistema antibloqueo (ACS=Anti Clogging System) asegura la trituración de las fibras. Además, técnicas de construcción particulares permiten aumentar el caudal de agua en el interior del circuito de refrigeración, garantizando una eficiente refrigeración del motor en los casos de instalación en seco.

Système de refroidissement

Sistema de refrigeración

Disponible avec **système de refroidissement** par liquide traité ou par un circuit extérieur ou possibilité de fluxage des dispositifs d'étanchéité.
De nouvelles astuces de construction permettent d'effectuer l'entretien de la chemise de refroidissement sans agir sur le moteur et sur le câble d'alimentation.

Disponible con **sistema de refrigeración** mediante líquido tratado o desde un circuito externo y con la posibilidad de fluidificación de las juntas de estanqueidad.
Nuevas técnicas de fabricación permiten efectuar el mantenimiento de la camisa de enfriamiento sin intervenir en el motor y en el cable de alimentación.

Clapet antiretour à bille
Válvula de retención de bola

Courbe d'aspiration avec embase
Curva de aspiración con base

Installation à sec avec chemise de refroidissement
Instalación en seco con camisa de refrigeración

Diffuseurs de fond à disque et tubulaires

Indiqués pour l'installation dans les systèmes d'aération civils et industriels, il peuvent être dotés de membrane percée pour boules fines ou grosses. Les accessoires fournis ont été conçus pour réduire les délais de montage et assurer des performances élevées et constantes au fil des années.

Difusores de fondo de disco y cilíndricos

Son idóneos para los sistemas de ventilación civiles e industriales. Pueden estar dotados de una membrana con orificios para burbujas finas, medias o gruesas. El conjunto de acoplamiento ha sido concebido para reducir el tiempo de montaje y garantizar elevadas prestaciones constantes en el tiempo.

Mélangeurs électriques plongés

Les mélangeurs plongés représentent des composants essentiels dans les modernes systèmes de traitement des eaux. Des modèles de 1,1 à 15 kW à 4 et 6 pôles sont disponibles. Ils sont dotés d'accessoires d'installation en charpenterie galvanisée ou en acier inoxydable et treuil de soulèvement.

Mezcladores eléctricos sumergibles

Los mezcladores eléctricos sumergibles constituyen los componentes esenciales de las instalaciones modernas de tratamiento de las aguas. Están disponibles los modelos de 1,1 a 15 kW con 4 y 6 polos. Conjuntos de accesorios de instalación, de estructura galvanizada o de acero INOX y cabrestante de elevación.

**BREVETÉE
 PATENTADA**

Vanne de fluxage

Elle est pré-réglée pour une plus simple installation sur les pompes électriques Zenit SMN et SBN et permet, à chaque démarrage, d'agiter les eaux du puits de collecte, afin d'éviter la formation de sédiments. Elle est dotée d'un dispositif de réglage du temps d'ouverture.

Válvula de fluidización

Está preparada para su fácil instalación en las bombas eléctricas Zenit SMN y SBN. En cada arranque, permite poner en movimiento las aguas del colector de recogida para evitar así la formación de sedimentos. Equipada con dispositivo de regulación del tiempo de abertura.

Commander 20 et 50

Boîtier pour la gestion automatisée du système. Possibilité de contrôler jusqu'à 5 pompes, en réglant les démarrages et les seuils de déclenchement. Outre les systèmes d'alarme standards acoustiques et visuels, il signale les anomalies ou les mauvais fonctionnements éventuels même à distance, par un SMS.

Commander 20 y 50

Caja de control para la gestión automatizada de la instalación. Posibilidad de controlar hasta 5 bombas y de configurar los arranques y umbrales de una intervención. Además de los sistemas normales de alarma acústica y visual, también indica anomalías o disfunciones, incluso a distancia, mediante SMS.

Équipements électriques

Une vaste gamme de tableaux électriques et accessoires est disponible sur la demande du client.

Equipos eléctricos

Existe una amplia gama de cuadros eléctricos y de accesorios disponibles bajo pedido del cliente.

Systèmes d'oxygénation OXYGEN

Les éjecteurs OXYGEN 80, 100 et 150 se caractérisent par la présence d'une cloison interchangeable revêtue en matériel polyuréthane (Vulkollan), très résistant à la corrosion, qui, fixée par des vis, peut être rapidement remplacée et faciliter le réglage du système et les opérations d'entretien éventuelles.

Sistemas de oxigenación OXYGEN

Los dispositivos eyectores OXYGEN 80, 100 y 150 están caracterizados por la presencia de un diafragma intercambiable recubierto de material poliuretánico (Vulkollan) altamente resistente a la corrosión. Al estar fijado mediante dos pernos, este diafragma se puede sustituir rápidamente para facilitar así el ajuste inicial de la instalación y de las posibles intervenciones de mantenimiento.
