

ABOVE GROUND SUBMERSIBLE VALVE PACKAGE

Gorman-Rupp's unique J Series® Above Ground Submersible Valve Package places controls and valves above ground in an attractive, corrosion-, mildew- and vandal-resistant fiberglass enclosure. The compact, economical design reduces site space requirements by eliminating the need for a separate valve pit.

This design permits safe and easy access to controls or valves for maintenance or service. There is no need for service personnel to enter a hazardous valve pit.

Gorman-Rupp's Above Ground Submersible Valve Packages are available with J Series slide rail-mounted submersible pumps, 3" to 6" pump sizes, capacities to 2300 GPM and head to 205 feet. Larger sizes are available by utilizing other enclosure styles.

TOTAL SYSTEM RESPONSIBILITY

An efficient and reliable pumping system is dependent on the precise matching of the pumps, motors and controls. Gorman-Rupp designs, engineers and manufactures the entire pumping system to ensure that the system meets your requirements and performs reliably year after year. When you buy from Gorman-Rupp, you never really just buy a pump. If there is a problem with the system, you have to make only one call. From pumps and controls, to the lights and ventilation blowers in our enclosures, we have an experienced staff of engineers dedicated to design and construction. Their extensive knowledge of electronics, mechanics and hydraulics is at your disposal. And, our 60 month limited station warranty covers the entire packaged system.

Optional discharge and suction line bypass pump connections available.

- Discharge bypass connection allows for emergency portable bypass pump access to the pump station force main after isolation of the pumps.
- Suction bypass connection incorporates opening to allow emergency portable bypass pump access to pump station wet well.

Gorman-Rupp offers a complete line of portable engine driven pumps for bypass (Automatic and Manual start).

Consult factory for Class 1, Div. I & II hazardous classifications (NFPA 820).

UL listing available on complete station (excluding enclosure).
