

2/3 KVE 3-6-10

INVERTER DRIVEN CONSTANT PRESSURE BOOSTER SETS WITH 2 OR 3 MULTISTAGE CENTRIFUGAL PUMPS.

EE G ...
PAGE 176

TECHNICAL DATA

Operating range: from 1,8 to 41 m³/h.

Pumped liquid: clean, free of solids and abrasives, non viscous, non aggressive, non crystallised and chemically neutral, with properties similar to water.

Pumped liquid temperature range: from 0 °C to +85 °C.

Maximum ambient temperature: +40°C.

Maximum operating pressure: PN16.

Special executions on request: contact our sales network.

Protection class: IP44.

APPLICATIONS

Water lifting sets particularly suited for domestic use, and small civil, agricultural, or industrial systems. The use of vertical axis multistage centrifugal electric pumps ensures high performance results.

Their main features are limited space requirements, sturdiness, absolute reliability, and extremely quiet operation.

CONSTRUCTION FEATURES

SETS WITH 2 -3 PUMPS

HYDRAULIC SECTION

2 - 3 KV 3 - 6 - 10 vertical multistage electric pumps.

Tropicalized galvanized sheet steel base complete with 4 rubber anti-vibration feet.

Tropicalized galvanised steel suction and delivery manifolds, threaded for 2 KVE 3-6-10 and 3 KV 3-6 sets, flanged for 3 KVE 10 sets.

Plugs or blind flanges for closing the manifolds.

Ball valves with unions on the suction and delivery ports of each pump.

Check valves on the suction port of each pump.

2 - 3 membrane tanks.

Radial manometer with isolator valve.

Electric control panel support in galvanised steel.

ELECTRICAL SECTION

See the characteristics of the control panel with inverter at the start of the section.

The sets are supplied in a sturdy cardboard packaging on wooden pallet and instruction leaflet with electric diagram.

INVERTER DIAGRAM

The inverter continuously adjusts the rotation speed of the electric pump, keeping the pressure constant, even when the flow rate varies.

The other electric pumps, with fixed speed, are activated in cascade after the first one has reached maximum speed. Through modulation, they compensate the pressure fluctuations of the system. For every operating cycle, it is possible to switch the restart to a different pump, therefore ensuring even use of all electric pumps.

It is possible to set operation times for each individual pump, switching to another pump after such set times.

The "SP" pressure can be adjusted by the user using two "+" and "-" keys on the electric control panel.

MATERIALS

N.	PARTS	MATERIALS
4	IMPELLER	TECHNOPOLYMER B
6	DIFFUSER	TECHNOPOLYMER B
7A	PUMP SHAFT	AISI 416 STAINLESS STEEL X12 CrS 13 UNI 6900/71
16	MECHANICAL SEAL	CARBON / CERAMIC
28	OR RING	EPDM RUBBER
69	LINER	AISI 304 STAINLESS STEEL X5 CrNi 1810 UNI 6900/71
95	OR RING	EPDM RUBBER
96	SUCTION BODY	CAST IRON 200 UNI ISO 185
97	DELIVERY BODY	CAST IRON 200 UNI ISO 185
98	DIFFUSER BODY	TECHNOPOLYMER B

2 KVE 3 - RESIDENTIAL CONSTANT PRESSURE BOOSTER SETS

Pumped liquid temperature range: from -15 °C to +85 °C - Maximum ambient temperature: +40 °C - Max flow rate: 14.4 m³/h

The performance curves are based on kinematic viscosity values = 1 mm²/s and density equal to 1000 kg/m³.

Curve tolerance according to ISO 9906.

Overall performance taking into account TWO pumps working at the same time.

3 KVE 3 - RESIDENTIAL CONSTANT PRESSURE BOOSTER SETS

Pumped liquid temperature range: from -15 °C to +85 °C - Maximum ambient temperature: +40 °C - Max flow rate: 24 m³/h

The performance curves are based on kinematic viscosity values = 1 mm²/s and density equal to 1000 kg/m³.

Curve tolerance according to ISO 9906.

Overall performance taking into account THREE pumps working at the same time.

3 KVE 6 - RESIDENTIAL CONSTANT PRESSURE BOOSTER SETS

Pumped liquid temperature range: from -15 °C to +85 °C - Maximum ambient temperature: +40 °C - Max flow rate: 27 m³/h

The performance curves are based on kinematic viscosity values = 1 mm²/s and density equal to 1000 kg/m³.

Curve tolerance according to ISO 9906.

Overall performance taking into account THREE pumps working at the same time.
