

WZ/DZ - CONTROL BOX

Application

Control box for portable standard pumps. The unit allows automatic operation of the pump with two level controllers. It protects the pump against overload and overtemperature. Single phase types include starting devices for the pump.

Two float switches (on and off) type MS1, MS1 C BO/BS are connectable. Particularly suitable for stainless steel pumps in chemical aggressive fluids.

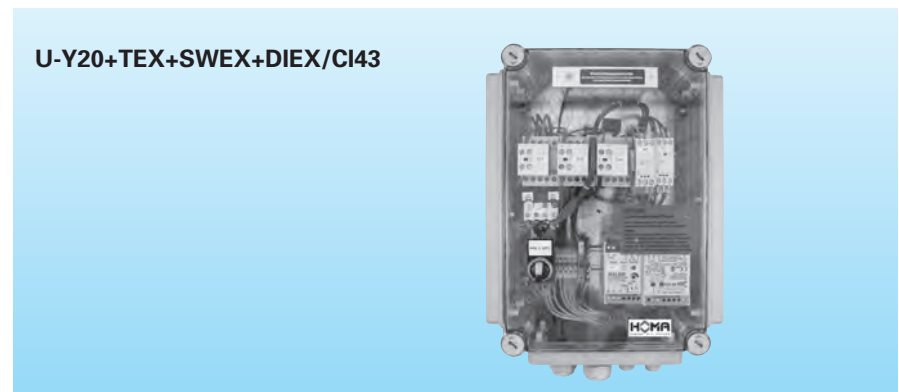

U - CONTROL BOX

Application

Switchgear for a pump in a modular design, universally applicable.

The device is suitable for the protection and control of pumps up to 30 kW.

Suitable for both normal pumps and for ex-pumps. The functionality of the basic configuration can be changed or supplemented by the inclusion of various components.

AZW/AZD - CONTROL BOX

Application

Level control for one standard pump. Control box for interconnecting between pump cable and power socket.

Composite housing with:

- Float switch AS type (min-max)
- Plug and socket
- AZW-type: housing with integrated
- safety plug and socket 230V
- AZD type: housing IP54 with conductor, CEE plug and socket
