

### TD-40 REPLACEMENT ROTATING ASSEMBLY

Renew old style (Tangential Discharge) Armstrong and B&G base mounted centrifugal pumps by replacing all rotating components using the Armstrong TD-40 program. TD-40 units are fully assembled at the factory to contain the Bearing Assembly, Coverplate, Seal Kit, Casing Gasket, Impeller and Hardware. TD-40 units are designed for Cast Iron body, Bronze Fitted pumps. Impellers are trimmed to size on request.

Available sizes are shown in the following table:
