BRAN+LUEBBE Offers Your Company The Complete Solution!

Bran+Luebbe isn't simply an equipment supplier - we are an equipment manufacturer, an engineering resource, an experienced fabricator and a strongly committed aftermarket service provider. We are a supply partner with virtually all major corporations.

ENGINEERING DESIGN

- Staff engineers work in unison with designers to ensure comprehensive design and support level documentation and detailed drawing packages.
- 3-D modeling utilized to guarantee the best results.
- Constantly aware of changes in technologies, Bran+Luebbe engineers are positioned to offer clients the most complete and cost-effective solutions to the most complex situations.

PROJECT MANAGEMENT

From inception to completion, Bran+Luebbe Project Engineers thoroughly manage project milestones on each job and assure that every phase is brought to a successful conclusion.

MANUFACTURING

- With single-source responsibility fabrication, welding and finishing, we guarantee that both our equipment and packaged systems are delivered with the highest industry standards.
- ISO-9001 certified, Bran+Luebbe controls the purchase and receipt of all buy-out equipment to ensure compliance with all applicable specifications, requisite standards and systems compatibility.

TESTING & AFTERMARKET SUPPORT

- Our equipment and skid packages are subjected to both in-house hydrostatic and functional, performance testing.
- Worldwide manufacturing & warehousing in:
 - Delavan, Wisconsin Hgt.
 Baton Rouge, Louisiana
 Houston, Texas
 - Rochester, New York Norderstedt, Germany
- Brixworth, England Singapore, Malaysia

Sao Paulo, Brazil

B+L maintains an inventory of more than 40,000 standard components. Most of these locations include factory trained, field-service personnel.

... from start to finish, we are your partner in success.

Unparalleled Experience and **Dedication Worldwide**

Bran+Luebbe's powerful presence dominates the Sanitary Market. Globally, our installed base is equally strong – and a testimony to the competence of our engineering, the depth of our experience, the reliability of our machinery, and our commitment to aftermarket service and support.

These factors have lead us to become one of the most respected and reliable suppliers in these markets.

Demanding Applications Require Process System Solutions

FOOD & BEVERAGE APPLICATIONS

- **Alcohol Dilution**
- Applesauce Blending
- Beer Finings Injection
- **Candy Flavor** and Color Proportioning
- **Canned Fruit and Vegetable Liquors**
- **Cheese Whey**
- Continuous **Bourbon Blending**
- Continuous **Brandv** Production
- Cottage Cheese **Color Injection**
- Cough Drop Premix
- **Diced Tomato** Metering
- **Diluted Hops** Addition to Beer
- Fruit Juice Blending
- **High-Fructose Corn Syrup** Dilution
- Ice Cream Blending
- Jam/Jelly Blending
- Ketchup, Sauce,
- Salsa Blending

- Maple Syrup Dilution
- Margarine Blending Mayonnaise/Salad
 - **Dressing Blending**
- Milk Metering
- Milkshake Syrup Blending
- **Oils and Shortening**
- **Orange Juice** Blending
- Pet Food
- **Additive Injection**
- **Pickle Juice Blending**
- **Pizza Sauce** Blending
- **Preparation of** Champagne for Secondary Fermentation
 - Soft Drink Production
- **Snack Food Additive Injection**

- Spaghetti Sauce Blending
- Sports Drink Dosing and Mixing
 - **Tomato Paste and Puree Production**
- Whipping Cream Proportioning
 - **Yogurt Blending**

PERSONAL CARE APPLICATIONS

- **Baby Oil**
- Bar Soap Manufacturing
- Cologne
- Custom Pilot **Systems**
- Deodorant/Anti-Perspirants
- Disinfectants
- Fabric Softener
- **Gel Shave Cream**
- Hair Conditioner
- Hair Setting Gel
- Hairspray
- Intravenous **Emulsions**

- **Liquid Cosmetics** Liquid Household Cleaners Mouthwash
- **Pill Coating** Slurry
- Prescription **Tablet Coatings**
- Shampoo
 - Skin Care Lotions
- **Soap Additives**
- Surfactant Dilution
- Transdermal **Patches**

WHY SPX PROCE With SPX Process Equipment As

LIQUID INGREDIENT INJECTION

A system that will accurately meter small quantities of liquid ingredients into a pipeline or batch tank. The system is ideal for addition of colors, flavors and or other ingredients.

A Bran+Luebbe yogurt/ whole fruit blending system proportions the fruit accurately, and blends it thoroughly into the yogurt base. Less fruit is required to achieve the same consistency produced by batch mixing methods.

YOGURT BLENDING SYSTEM

WAUKESHA CHERRY-BURRELL

- WCB's traditional "Can-Do Pump". Versatile in application, its reliability has made it the industry standard worldwide for over 50 years. Easy cleaning in both CIP and COP models with pressures up to 500 psi. In addition, pumps can be remanufactured. WCB also offers a wide range of centrifugal pumps, valves, fittings, heat exchangers and dispersion equipment.
- A Bran+Luebbe continuous mayonnaise/salad dressing processing systems eliminate complex valve and pipe

arrangements, and the large process tank areas associated with batch processing. The system reduces both cost and waste by producing accurate and consistent finished products.

SHAVING GEL HYDROCARBON BLENDING

Utilizing an in-line system for hydrocarbon/ gel proportioning and blending, in a sealed environment, eliminates foaming and maximizes hydrocarbon yield.

HIGH-ACTIVE SURFACTANT DILUTION

 High active material may be easily processed to a homogeneous low active solution on demand with a field proven dilution system. Advantages include stable high active storage, no gelling, fish-eyes or aeration, lower material purchase and transport cost.

Our in depth processing knowledge and state-of-the-art design tools are used to combine quality components into fully featured packages that provide our customers with security, value for money and ultimately a more consistent and controllable process.

LIGHTNIN

BRAN+LUEBBE USA

3

- Bran+Luebbe sets the standard for accuracy and reliability. 3A-Quick Release design pump heads for packed plunger and sealless double diaphragm pumps.
- LIGHTNIN SR Sanitary Mixers. Low-headroom, right angle drive with low center of gravity
 tanks can be easily moved with the mixer in place. Smaller footprint for restricted head geometries on tanks ranging from 100 to 30,000 liters.
