

Ideal for removal of residual water down to 1mm - for professional use

Original residue dewatering pump capable of pumping down to floor level. Even the smallest puddle can be pumped dry.

Ideal for complete drainage of flat surfaces where a sump is not available: rooftops, parking lots, garages, roadways, pools,.....

Features:

- Double mechanical seal with lapped SiC rings in oil bath, as used in large heavy-duty pumps
- When placed directly on a hard surface, strainer allows water to be removed down to 1mm
- A peripheral diaphragm type check valve right above the strainer prevents loss of water when the pump is lifted or stopped
- The pump's bottom plate has rubber all-around it, it cannot damage delicate surfaces

Pumped water cools the motor and discharges as illustrated. The motor can be cooled even when pumping a small amount of water. The top discharge arrangement allows access into areas with space limitations.

The pump can be run continuously in air.

Standard Accessories:

- 1 Cable 10m
- 1 Hose band
- 1 ø25mm union and hose coupling

No.	Descriptions	No.	Descriptions

Dry weight of the pump without cable

Discharge bore mm		25	LSC	
Pumping Fluid	Type of Fluid	Cleaning water, Water on floor, Puddles		
	Liquid Temperature	0 - 40°C		
Pump	Components	Impeller	Semi-vortex type	
		Shaft Seal	Double mechanical seal	
		Bearing	Shielded ball bearings	
	Material	Impeller	Urethane rubber	
		Casing	Ethylene propylene rubber	
		Suction Cover	Steel plate + urethane rubber	
Shaft Seal (mechanical Seal)	Silicon carbide in oil bath			
Motor	Type, Poles	Dry-type submersible induction motor, 2 poles		
	Insulation	Insulation class E		
	Phase / Voltage	Single phase / 230V/110V		
	Motor Protector (built-in)	Circle thermal cut-out		
	Lubricant	Turbine oil (ISO VG32)		
	Material	Frame	Aluminium die casting	
		Shaft	Stainless steel EN-X6Cr13	
Cable		Rubber, H07RN-F		
Discharge Connection		Hose coupling		

LWL: lowest running water level

We reserve the right to change specifications and designs herein for improvement without prior notice. Our pumps are for professional use only. In the event that Tsurumi (Europe) GmbH have, in exceptional cases taken over, a manufacturer's warranty, this entitles the end-user to assert remedy free of charge against Tsurumi (Europe) GmbH due to any defect to the product occurring during the guarantee period (see below), also then when the warranty claims against the seller do not or no longer exist. In the event of malfunction, which is attributable to the improper handling by the enduser, no guarantee claim shall arise. Further claims shall not result from the warranty, unless if something to the contrary has explicitly been determined. The decision as to whether remedy is effected by way of replacement or repair shall be at the choice of Tsurumi (Europe) GmbH. The claims shall be time barred after a period of three months after expiry of the guarantee period, however, not before expiry of the warranty period which is valid towards the seller. In the event of doubt, the warranty period shall correspond with the warranty period which is valid between the end-user and his seller.
